

CHRIS SHERMAN

<https://shermandigital.com>
chris@shermandigital.com

I started with building websites in elementary school, and since then I've developed expertise in software engineering, team leadership, and project management. Today I'm passionate about engineering fast, scalable applications powered by the cloud. My skills and experience enable me to deliver a holistic approach that generates results.

PROFESSIONAL EXPERIENCE

Software Engineering Manager at Cloudistics 2015-Present

Manage a team of 10 front end engineers and develop cloud services

- Devised front-end architecture for cloud management platform from ground up
- Manage geographically distributed engineers as a cohesive team
- Created repeatable process for interviewing, onboarding, and mentoring engineers
- Formulated performance evaluation, sprint, and continuous improvement processes
- Serve on architecture team responsible for R&D of new features
- Redesigned Cassandra data model, web API, and UI to reduce latency by 96%
- Established Docker workflow that reduced environment configuration time by 95%
- Designed core entities of PostgreSQL relational data model
- Invented technique to maintain performance with excess of 2,000 AngularJS bindings

CAUSES

Mentor at CoderDojo

2015-Present

CoderDojo is a global movement of free coding clubs for children. I help young people develop their problem-solving skills while creating websites, apps, games, and more.

Fundraising & Events

Committee at Habitat for Humanity

2015-Present

I enlist businesses and individuals to devote the resources necessary for carrying out Habitat's mission of making home ownership attainable for families in Washington, DC.
